

## DAIMLER TRUCKS NORTH AMERICA AFTERMARKET

**No.: 19 TL-9**  
July 29, 2019

TO: Service Locations

FROM: Service Systems Development

SUBJECT: **Haweka Axis4000™ Alignment System**

### GENERAL INFORMATION

DTNA Special Tools Group has approved the use of Haweka's Axis4000 aftermarket alignment system for use on DTNA products at DTNA service locations. The Axis4000 system uses the reference points required by DTNA for precise, accurate, and repeatable measurements. Axis4000 is a sophisticated, user-friendly system that utilizes computer based camera-radio technology and references the center line of the frame for measuring and providing alignment results to DTNA specifications.

Axis4000 is manufactured by Haweka AG and distributed throughout North America by its partner Allpart Supply in Texas. The system is globally endorsed and accepted in the Mercedes Benz homologation program.

### INSTRUCTIONS

Operating instructions are included in the purchase of the Axis4000 System. In addition, all operating and measurement instructions are provided step by step in the system software. Further operating and service information can be obtained by contacting either Allpart Supply or Big Rig Alignment Company.

### FEATURES

- Center Line of Frame Measurement System.
